Mortar Matters

COLOR

Choosing the right mortar color and technique can make all the difference when building your vision. Whether you're going for contrast or a more even-toned aesthetic, our range of mortar colors can help bring your ideal look to life. Choose from a standard concave joint, over mortar or grapevine joint to further customize your project.

JOINT

Add a tasteful touch with an unexpected mortar technique. Different mortar treatments, such as standard concave, over mortared joints, grapevine, or recessed significantly impact the overall aesthetic of brickwork, influencing the appearance of texture, depth, and architectural style.

Installation Methods

ADHESIVE

This method is often used for interior applications or on substrates where traditional mortar might not be suitable.

THICKSET (LATH + SCRATCH)

Involves a thick mortar bed, ideal for uneven surfaces or when additional leveling is needed, often used in interior or limited height exterior installations.

THINSET (MODIFIED MORTAR + CEMENT BOARD)

Utilizes a thin layer of adhesive mortar with improved characteristics, suitable for flat and even substrates, commonly used in commercial or multi-story installations.

SUPPORT SYSTEM BY GLEN-GERY: THIN TECH® AND TRU BRIX®

Panel are Pre-engineered metal support solutions that can speed up installation, enhance performance and ensure uniformity.

EMBEDDED: PRECAST AND TILT-UP

These are factory-made or site-poured panels with thin bricks embedded in concrete.
